

ADVANCED EQUIPMENT COMPANY

50 Years of Service

Proudly serving North and South Carolina for 50 years.

From our start in 1960, material handling systems integration has been at the heart of our business. Our leadership and experience in this industry is second to none. AEC provides complete automated material handling equipment solutions – from design and delivery, to engineering and implementation. Our expert engineers work with you to develop highly customized automated material handling equipment solutions with minimum interruption to your operations. No matter what your industry, we have the experience you need to gain a competitive advantage through automated material handling equipment systems integration.

Our 50 years of experience, providing material handling solutions, means you get more than just top-notch products – you get strategic insight that comes only with years in business. We also stress our “one client one contact” rule, so you’re never bounced from person to person at AEC. You are assigned one Project Engineer throughout your project.

Intelligent Systems

Leading Technologies and Proven Strategies

As a systems integrator, Advanced Equipment Company will continue to seek out leading technologies in both material handling equipment and controls systems coupled with proven operational strategies. Our goal is to use these tools to help companies, across a broad spectrum of industry segments, to be leaders in their industries.

Automated Supply for Competitive Advantage

Advanced Equipment Company is dedicated to creating superior material handling systems for the automation of supply chain logistics. We integrate innovative products to help companies throughout the world excel in their individual markets and implement their

The Boy Scouts of America undertook a major re-vitalization of our distribution center. As part of that project, Advanced Equipment was selected to design and install new material handling equipment. Included was multi-level conveyor picking, staging and shipping equipment, as well as an outbound sortation system. Advanced Equipment designed, delivered and executed on time and as promised; well above my expectations. Their expertise and professionalism mirrors that which the BSA has come to stand for. I do not hesitate to recommend them.

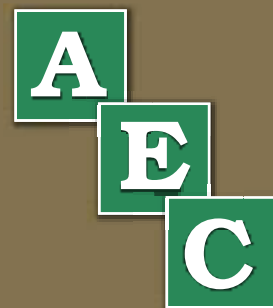

— Mark Winkelman, The Boy Scouts of America

strategic business goals. Success through the control of material flow, information flow, and operational processes can yield a huge competitive advantage. Our integrated material handling systems reduce the total cost of order fulfillment and the cycle time for the end customer to receive their product.

Quality Products and Quality People

The success of AEC has been selecting only quality products to provide as solutions for our customers and the most qualified people in our industry to make it happen. Today AEC is the premier Material Handling Solutions provider in North and South Carolina and is nationally respected as one of the best of the best.

Project Analysis + System Design + Effective Solutions

Why Partner with AEC?

We can meet your strategic business goals. AEC has a long history of completing projects that exceed our customer's expectations.

AEC is an independent integrator. We select the right equipment from the industry's best manufacturers. Unlike manufacturer based integrators, our equipment selection is unbiased. This will result in the best overall technology for your facility.

Eaton Corporation Greenwood plant has been dealing with Advanced Equipment Company for many years. Advanced Equipment Company has always furnished us with expert assistance on many projects to improve the Greenwood Operation. They have been instrumental in supplying equipment and expertise to upgrade our manufacturing areas with the latest technology available. Conveyors, Lean Lift storage systems, ergo handlers and lift tables furnished by Advanced Equipment has enabled Greenwood to set up Lean Manufacturing Cells that have tripled our productivity. Tony Stewart, our present Advanced Equipment rep has answered our every request for help or recommendations for upgrading our operations and we have nothing but praise for his efforts.

— Dan Daigrepoint, Senior Engineer

Our talented Sales Engineers provide the best system design and strong field support to successfully implement our customer's projects.

AEC's expert project management and certified technicians ensure the installation is performed correctly and on schedule.

AEC utilizes a dedicated and experienced Sales Engineer to manage the project from inception to completion.

AEC has a strong history of financial strength and stability with over 50 years in business, and a strategic plan for continued growth.

Turnkey Solutions

Where We Excell

Technological advances can change the way products are handled throughout your material handling system. Implementing a solution that is not only dependable and innovative, but offers versatility, is where Advanced Equipment Company excels. Our extensive product mix, from the best manufacturers in the industry, offers equipment to fit most applications. 50 plus years of design experience ensures that you get the right solution for the job.

AEC provides turnkey solutions from project analysis, through system design and successful implementation. We take great pride in providing exceptional service and flexibility to our customers.

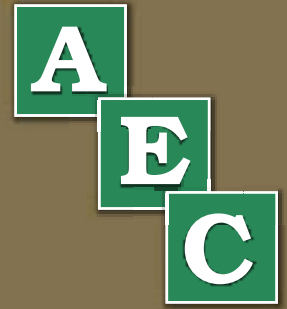

We have purchased a number of systems and equipment from AEC to support our growing needs. Quality has been our requirement and AEC has met this need without hesitation. As a maintenance manager I am constantly evaluating our needs and looking at long term reliability and expense; without a doubt, AEC is supporting this with continuous customer service and contact. And with the ability to cover both a clean room environment to a warehouse; I look forward to a long company involvement between AFG Wipes and AEC.

— **Scott Marsh, Facilities / Maintenance Manager**

Advanced Equipment Company solutions vary in complexity from simple manual to highly automated systems. Typical systems include carton handling and pallet handling conveyor for transport, accumulation and sortation; Automated Storage and Retrieval Systems (ASRS); Mobile Aisle Storage Systems; Ergonomic Lifting and Handling Systems and Storage and Order Picking Systems. Every solution Advanced Equipment Company proposes is considered on its own merits to provide tremendous productivity gains and a quick return on investment.
