

THE HYTROL ADVANTAGE

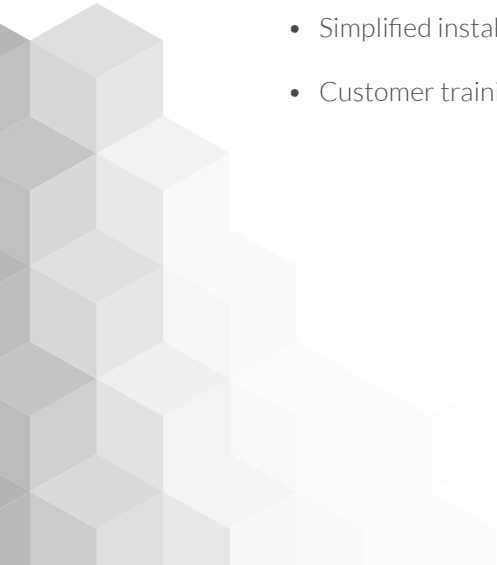

Hytrol is an industry expert in automated material handling solutions and is the largest conveyor manufacturer in North America. With experts all over the United States and around the world, Hytrol's Integration Partner Network provides the solutions you need at the time you need them. Our unmatched service, innovative products, and variety of applications can improve profitability and sustainability in your supply chain.

## ADVANTAGES OF CHOOSING HYTROL

- Over 70 years of stable ownership
- Concept and systems engineering
- Local support networks
- Customer application testing
- Industry's best on-time delivery
- Simplified installation and start-up assistance
- Customer training and educational support

## OUR SERVICE

Solutions are only as good as the people behind them. We understand that, and that's why we invest in smart, creative, and driven individuals within our company and throughout our Integration Partner Network. When you work with Hytrol, you receive the on-site expertise and instant assistance you need from experts around the country, specializing in a variety of solutions.

Our Integration Partner Network is more than an intermediary; it's a network of experts who implement the right systems for you. They go beyond understanding the equipment and translate their knowledge into the understanding of your unique business, equating to more comprehensive care for you.

## HYTROL INTEGRATION PARTNERS PROVIDE:

- Consultation
- Design assistance
- Software
- Layout
- Installation
- After-sale support

## OUR INNOVATIONS

We don't just adapt to new technology; we create it. Hytrol develops new concepts and solutions through design collaboration with integration partners and customers. These are constantly being developed at Hytrol's Technology Center, located near Hytrol's main facility in Jonesboro, Arkansas.

Our technological advancements can change the way products are handled throughout the material handling system. Implementing a system that is not only dependable and innovative, but offers versatility, is where Hytrol excels. These intelligent systems deliver results that address your current business needs while preparing for your future growth.

**Connex® Plastic Chain**

Ideal transport solution for food, packaging, and pharmaceutical industries

**ProSort**

A family of high-speed sliding shoe sorters with versatile divert options and high potential throughput rates

**EZLogic®  
Accumulation System**

A user-friendly method of zero-pressure control that combines the sensing accuracy of photo-electrics with discrete electronic logic control

**E24™**

A 24-volt DC conveying solution that delivers a powerful, long-lasting, and low-voltage means for product transport

**Pallet Handling**

A complete line of standard and specifically designed pallet conveyor systems for transportation and accumulation operations

## OUR QUALITY

Hytrol has been located in the United States since its formation in 1947. Our location allows us to directly supervise our product quality. Hytrol's cutting-edge manufacturing facility operates under Lean principles to produce conveyors with the shortest lead-times in the industry. Organized focus factories enable us to continually improve our processes and manufacture top tier solutions.

Everything is done at Hytrol with the customer in mind. We seek to create the most value possible through a top-quality product that helps create growth for your business.

## OUR SOLUTIONS

Hytrol has been designing, testing and manufacturing custom solutions for the material handling industry from day one. We specialize in solving unique challenges to positively affect your bottom line and your business. The list of industries we can handle is always expanding and always evolving, just like the companies we work with.
